Your appointment time

Date

PLEASE BRING THIS REQUEST FORM WITH YOU, YOUR MEDICARE CARD, HEALTHCARE AND PENSION CARDS AND ALL RELEVANT PREVIOUS FILMS.

ULTRASOUND OF ABDOMEN – Nothing to eat or drink 6hrs prior to your appointment. You can have a small amount of water if required. No smoking for 6 hrs prior to examination.

ULTRASOUND OF PELVIS, KIDNEYS AND BLADDER

Patients will need to arrive with a full bladder. Drink 1L of water an hour before the scan. For Children, drink 500ml of water 1hr before the scan. Adult, female pelvic patients, please note, it is routine to perform a transvaginal (internal) ultrasound unless otherwise indicated.

3D PELVIC ULTRASOUND

A full bladder is required. Drink 500ml of water 1hr prior to your appointment. For optimum results, your booking should be made between day 14 and day 22 of your cycle.

3D/4D PELVIC FLOOR ULTRASOUND

An empty bladder is required

PREGNANCY ULTRASOUNDS

A full bladder is required from approx. 5wks to 32 wks of pregnancy. Drink 500ml of water at least 1hr before your appointment. Patients > 32wks do not require any preparation. It is important to bring all other previous films/reports related to your current pregnancy.

Your doctor has recommended that you use SPECIALIST IMAGING PARTNERS. You may choose another provider but please discuss this with your doctor first.

ULTRASOUND FOR CHILDREN

For young children, it is often useful to bring a bottle, other drink or snack as well as a favorite toy or book to help keep your child as comfortable as possible. Parents are encouraged to stay with their children throughout the examination. Your child will need to keep relatively still during the test so that the sonographer and radiologist can obtain all the information that is required. If not required to fast, a feed prior to the examination is often helpful.

ULTRASOUND OF ABDOMEN FOR CHILDREN

No solids or milk prior to your child's appointment. For children under 1yr, please attempt to fast for 3hrs, Under 5yrs for 4hrs and over 5yrs for 6hrs prior to the examination. Water can be given whilst fasting.

ULTRASOUND OF PELVIS, KIDNEYS AND BLADDER FOR CHILDREN

For best results, the bladder needs to be full. Your child should empty their bladder 1hr prior to the examination and then drink 3-4 large glasses of water or juice. Your child should not go to the toilet to empty the bladder after drinks have been taken.

After -Hours and Saturday appointments available. For access into the building after 6pm weekdays and all day Saturday, please use intercom at King William St entrance.
